User flow

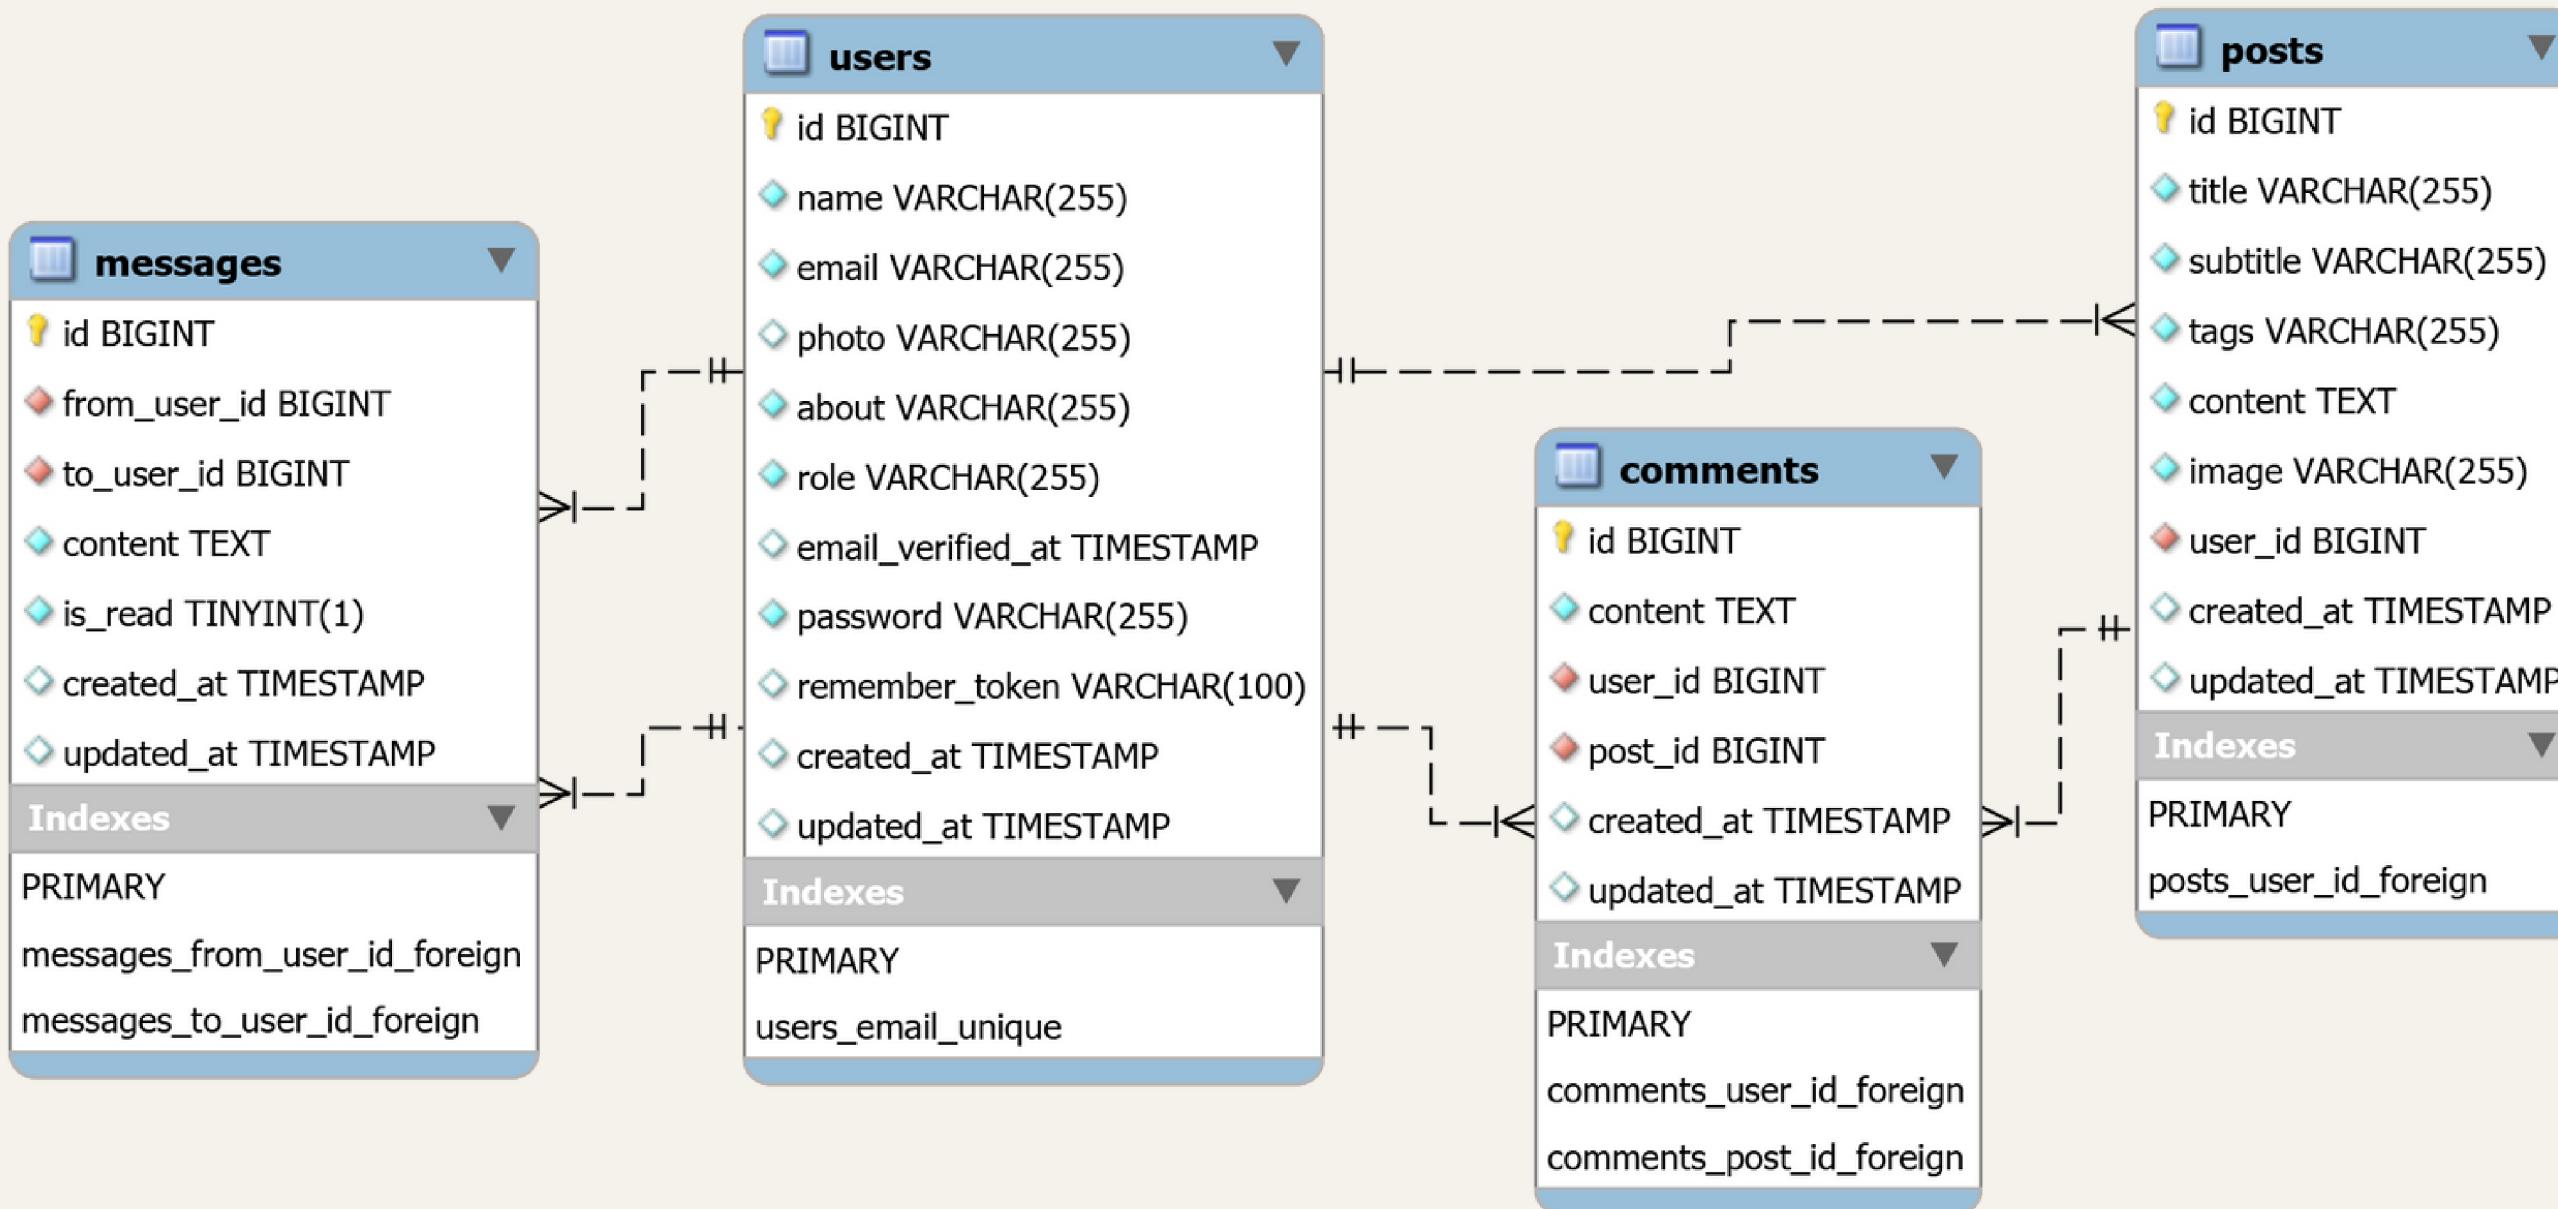

Figma file to organise user flow and visualise features needed on each page

The image displays a collection of Figma wireframes arranged in a grid, illustrating the user flow and design elements for a platform. The pages include:

- Desktop - 1:** Start Chatting, Next Great Idea.
- Desktop - 2:** Project Overview.
- Desktop - 3:** Project Grid.
- Desktop - 4:** User profile.
- Desktop - 5:** ADD POST FORM.
- Desktop - 6:** EDIT USER FORM.
- Post details:** Post details, Author, Comments.
- Admin:** Admin dashboard, Reported posts, Reported users, Reported comments.
- Home:** Search, All posts.

BIGDATA ETHICS

The Ethics of Data
Humanity Response

Data science has become a powerful tool for understanding and informing decision-making. We have access to an unprecedented amount of information at our fingertips, which presents both opportunities and challenges. It is important to consider the ethical implications of our actions and the impact they may have on society.

The screenshot shows a user interface for a social media platform. At the top, there is a navigation bar with a logo and a 'MY PROFILE' link. Below the navigation, a large blue banner features the text 'Popisd !M' and 'Chat it up, Share it out !'. Underneath the banner, there is a sub-headline 'TO TELL YOUR NEXT GREAT IDEAS' and a brief description: 'Connect, share & interact with one another effortlessly, fostering a sense of community and enabling the exchange of ideas and experience in real-time !'. A 'Join Us' button is visible. Below the banner, a section titled 'OPEN THE POST TO SEE IT IN DETAILS' contains two posts under the heading 'MY POSTS'. Each post includes a thumbnail image of two people at a table, a title, a short description, and a 'READ MORE' link. The titles and descriptions are identical for both posts.

Can view everything
on the website
(except users lists)

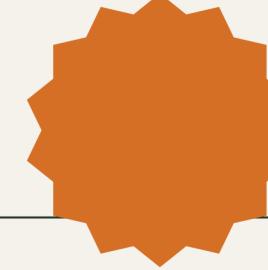

Can edit and delete created
comments and posts

Can edit created profile

Unregistered User

User level

Can view only the welcome page

Can see the resume of three last posts

May register profile or login into existing one

Encountered challenges

Database links

Ex. Chat page

Multiple informations that needed to be extracted from different tables of database and linked together in one component

Adaptation to Git workflow

Ex. Files conflicts

Merging conflicts while working on same files during the project realisation

Possible future prospects
